

Prices Ranges for Common Private Healthcare Services in Malaysia

 [Start Here](#)  [User Guide](#)

An Industry
Initiative by

Introduction

The Malaysian Insurers and Takaful Operators (ITOs) in collaboration with their industry associations (Life Insurance Association of Malaysia (LIAM), Malaysian Takaful Association (MTA), Persatuan Insurans Am Malaysia (PIAM)) had established a central medical claims data platform referred to as the "MHIT Database". This initiative aims to facilitate the disclosure and publication of the price ranges of the common healthcare services sought at private healthcare facilities in Malaysia.

Key Objectives: Driving Transparency in Price Ranges of Common Healthcare Services Sought at Private Healthcare Facilities

The publication of price ranges for common private healthcare services in Malaysia serves to achieve two key objectives, both integral to broader national reform efforts:

Enhance Price Transparency

This initiative is part of the strategic thrust to enhance price transparency under the national [RESET Framework](#), aimed at addressing rising healthcare costs and strengthening Malaysia's private healthcare ecosystem.

The [RESET Framework](#) is collectively pursued by the Ministry of Finance, Ministry of Health, Bank Negara Malaysia and various stakeholders including the insurance and takaful industry via the Joint Ministerial Committee on Private Healthcare Costs.

Click on the [RESET Framework](#) to view the full details.

01

02

Informed Decision Making

Beyond national framework, this objective also focuses on the patient experience.

This initiative is designed to empower patients by providing them with necessary information. By disclosing the price ranges for common healthcare services, patients can:

- Compare the cost of services and
- Make informed decisions regarding their care before treatment is administered.

Disclaimer

The information presented in this analysis is based on actual claims data submitted by ITOs for treatment sought by insured patients at private healthcare facilities. All figures are presented to **Malaysians for reference purposes only**, and should not be interpreted as definitive cost benchmarks for medical treatments.

The actual bill size may vary in accordance with the:

- patient's medical condition,
- complexity of the procedure,
- any specific implants, medications, or equipment required, and/or
- due to unforeseen complications that may arise during the procedure.

To make informed decisions, we strongly recommend taking the following actions:

Medical Advice: Consult your medical practitioner regarding the details of your procedure(s)/treatment(s).

Insurance/Takaful Coverage & Claims: Reach out to your insurance/takaful advisor to confirm the specific benefits and the reimbursable amount under your policy or certificate.

Prepared Date: December 2025

Frequently Asked Questions (FAQs)

1) What is this guide?

This guide shows estimated price ranges for 26 common healthcare services charged by the private healthcare providers in Malaysia.

The guide aims to help the public better understand typical costs of treatment. By disclosing the price ranges for common healthcare services, patients can compare cost and make informed decisions before receiving treatment.

The information provided is for general reference only and does not represent fixed or regulated prices.

2) Are these the exact prices I will be charged?

No. The prices shown are not fixed. Actual charges may differ depending on your medical needs, the healthcare provider, and the type of treatment required. You should consult your medical practitioner regarding the details of your treatment, as well as verify your policy coverage and limits with your insurance/takaful operator.

3) Who prepared this guide?

The guide was developed by the insurance and takaful industry, as part of the national RESET Strategy, to promote greater transparency in healthcare pricing.

4) Does this affect my insurance or takaful coverage?

No. This guide does not change your insurance or takaful benefits. Coverage remains subject to the terms and conditions of your policy.

Methodology of Analysis

1

Source of Data

The data were jointly submitted by the **Malaysian Insurers and Takaful Operators (ITOs)**. These are claims reported from 1 January to 31 December 2024.

2

Medical Coding Framework

The analysis includes admissions with both single and multiple procedures. For cases involving multiple procedure codes in one admission, the primary procedure is used for the purpose of this analysis.

The medical procedure classification is in accordance with the:

- Private Healthcare Facilities & Services Act 1998 (specifically the 13th Schedule).
- MMA Medical Procedures & Services Nomenclature (MPSN) & the Schedule of Relative Values.

The services listed are the common medical procedures reported by the insured populations.

3

Facility Category

This analysis focuses on **private healthcare facilities**.

The following facility types were excluded from the analysis to ensure the comparability of the data:

- **Public and government hospitals:** these institutions often incorporate government subsidies, which may distort the medical billing amounts and compromise the comparability of the analysis.
- **University and teaching hospitals:** these institutions were excluded due to limited sample sizes, which would constrain the robustness and statistical interpretations.

4

Admission Type

Only **Inpatient** and **Daycare** admissions are included.

Costs related to pre-hospitalization or post-hospitalization are not part of this analysis.

- **Inpatient:** defined as any admission cases with length of stay (LOS) exceeding one (1) day.
- **Daycare:** defined as any admission where the patient is discharged on the same day.

Methodology of Analysis

5

Number of Discharges

The Number of Discharges is categorised into the following bands:

- 1 - 49
- 50 – 99
- 100 - 499
- 500 - 999
- 1,000 – 4,999
- $\geq 5,000$

The banding category is to enable more meaningful comparisons and helps users to determine the reliability of the information.

Certain medical procedures may have limited discharge cases, especially when the analysis is further segmented by facility state or age group.

6

Outlier Treatment

To ensure the statistical reliability of the published price ranges and to prevent extreme values from skewing the results, an outlier removal process is applied to the analysis.

Any data point that falls below the 5th percentile and above the 95th percentile is excluded from the calculation of the **Average Length of Stay (LOS)**.

Cases with length of stay (LOS) exceeding 180 days are also excluded from the analysis.

7

Bill Amount

The **Bill Amount** refers to the amount charged by the healthcare providers to the Insurers and Takaful Operators (ITOs). This figure is used to establish benchmarks for **in-hospital expenses** and captures costs associated with a patient's admission (**Inpatient/Daycare**) and exclude patients whose conditions are of exceptional complex or who may be very ill.

These benchmarks are meant to cover typical cases and to cater for some variation in patients' conditions:

- **Typical Bill Amount:** 50th Percentile (Median/Middle Bound). Represents the midpoint of the bill amounts for the procedure(s).
- **Typical Bill Range:** from 25th Percentile (Lower Bound) to 75th Percentile (Upper Bound). Captures the central spread of costs for most cases.

All reported **Bill Amounts** are rounded to the nearest hundred Ringgit (RM) and are exclusive of any taxes.

Glossary

Term	Definition
ITOs	Insurers and Takaful Operators
LIAM	Life Insurance Association of Malaysia
LOS	Length of Stay
MHIT	Medical and Health Insurance / Takaful
MMA	Malaysian Medical Association

RESET Framework¹

Healthcare ecosystem RESET requires a whole of nation approach

Strategic Thrusts

Revamp MHIT

- 1) Develop base MHIT product to support value-based healthcare services
- 2) Improve aids and tools for consumers to determine health insurance needs and options

Enance price transparency

- 3) Display of retail drug prices
- 4) Establish a mechanism to consistently produce, monitor and publish key medical inflation measures
- 5) Legislative and regulatory review to strengthen oversight over private hospitals, support price transparency and DRG payments
- 6) Publication of price ranges for common healthcare services

Strengthen digital health system

- 8) Enhance the interoperability of Electronic Medical Records (EMR) to reduce duplication of diagnostic tests and procedures

Expand cost-effective options

- 9) Implementation and scaling up of Rakan KKM “Premium Economy” services
- 10) Incentivising expansion of affordable private healthcare providers including not-for-profit hospitals

Transform provider payment mechanisms

- 11) Phased implementation of Diagnosis-Related Groups (DRG) to replace existing fee-for-service (FFS) provider payment mechanism

Additional initiatives proposed by other stakeholders since the RESET Framework was introduced.

¹For further information, please refer to the feature article '[Securing Sustainable Access to MHIT Protection](#)' in BNM Annual Report 2024.

User Guide: Home

This is the 'Home' page of the Price Ranges for Common Healthcare Services.

There are 2 options that are located at the bottom of the page.

- 1 Click on 'Start Here' to begin using the Price Ranges for Common Private Healthcare Services.
- 2 Click on 'User Guide' to learn how to navigate the Price Ranges for Common Private Healthcare Services.
- 3 To perform a keyword search, press the 'Ctrl' and 'F' keys simultaneously for the search function to appear.

Type in the keyword then press 'Enter'.
If matches are found, click on the '<' or '>' button to locate the occurrences of the particular keyword.

User Guide: Introduction

Home Introduction Disclaimer FAQ Healthcare Services Methodology User Guide

1 **Introduction**

The Malaysian Insurers and Takaful Operators (ITOs) in collaboration with their industry associations (Life Insurance Association of Malaysia (LIAM), Malaysian Takaful Association (MTA), Persatuan Insurans Am Malaysia (PIAM)) had established a central medical claims data platform referred to as the "MHIT Database". This initiative aims to facilitate the disclosure and publication of the price ranges of the common healthcare services sought at private healthcare facilities in Malaysia.

Key Objectives: Driving Transparency in Price Ranges of Common Healthcare Services Sought at Private Healthcare Facilities

 The publication of price ranges for common private healthcare services in Malaysia serves to achieve two key objectives, both integral to broader national reform efforts:

2 **Enhance Price Transparency**
This initiative is part of the strategic thrust to enhance price transparency under the national [RESET Framework](#), aimed at addressing rising healthcare costs and strengthening Malaysia's private healthcare ecosystem.

The [RESET Framework](#) is collectively pursued by the Ministry of Finance, Ministry of Health, Bank Negara Malaysia and various stakeholders including the insurance and takaful industry via the Joint Ministerial Committee on Private Healthcare Costs.

3 **Informed Decision Making**
Beyond national framework, this objective also focuses on the patient experience.

This initiative is designed to empower patients by providing them with necessary information. By disclosing the price ranges for common healthcare services, patients can:

- Compare the cost of services and
- Make informed decisions regarding their care before treatment is administered.

Click on the RESET Framework to view the full details.

This section provides a background and objectives of the Price Ranges for Common Private Healthcare Services.

The following apply to all Price Ranges for Common Healthcare Services sections:

- 1** Click on the different tabs to move to the sections in the Price Ranges for Common Private Healthcare Services.
- 2** Click on the 'RESET Framework' word to view the full details of the framework.
- 3** Click on '⬅' button to return to the previous page.
- 4** Click on '➡' button to move to the next page.

User Guide: Disclaimer

Home Introduction **Disclaimer** FAQ Healthcare Services Methodology User Guide

Disclaimer

The information presented in this analysis is based on actual claims data submitted by ITOs for treatment sought by insured patients at private healthcare facilities. All figures are presented to **Malaysians for reference purposes only**, and should not be interpreted as definitive cost benchmarks for medical treatments.

The actual bill size may vary in accordance with the:

- patient's medical condition,
- complexity of the procedure,
- any specific implants, medications, or equipment required, and/or
- due to unforeseen complications that may arise during the procedure.

To make informed decisions, we strongly recommend taking the following actions:

Medical Advice: Consult your medical practitioner regarding the details of your procedure(s)/treatment(s).

Insurance/Takaful Coverage & Claims: Reach out to your insurance/takaful advisor to confirm the specific benefits and the reimbursable amount under your policy or certificate.

Prepared Date: December 2025

Click on each of the Body Systems or Common Healthcare Services to view the full details.  

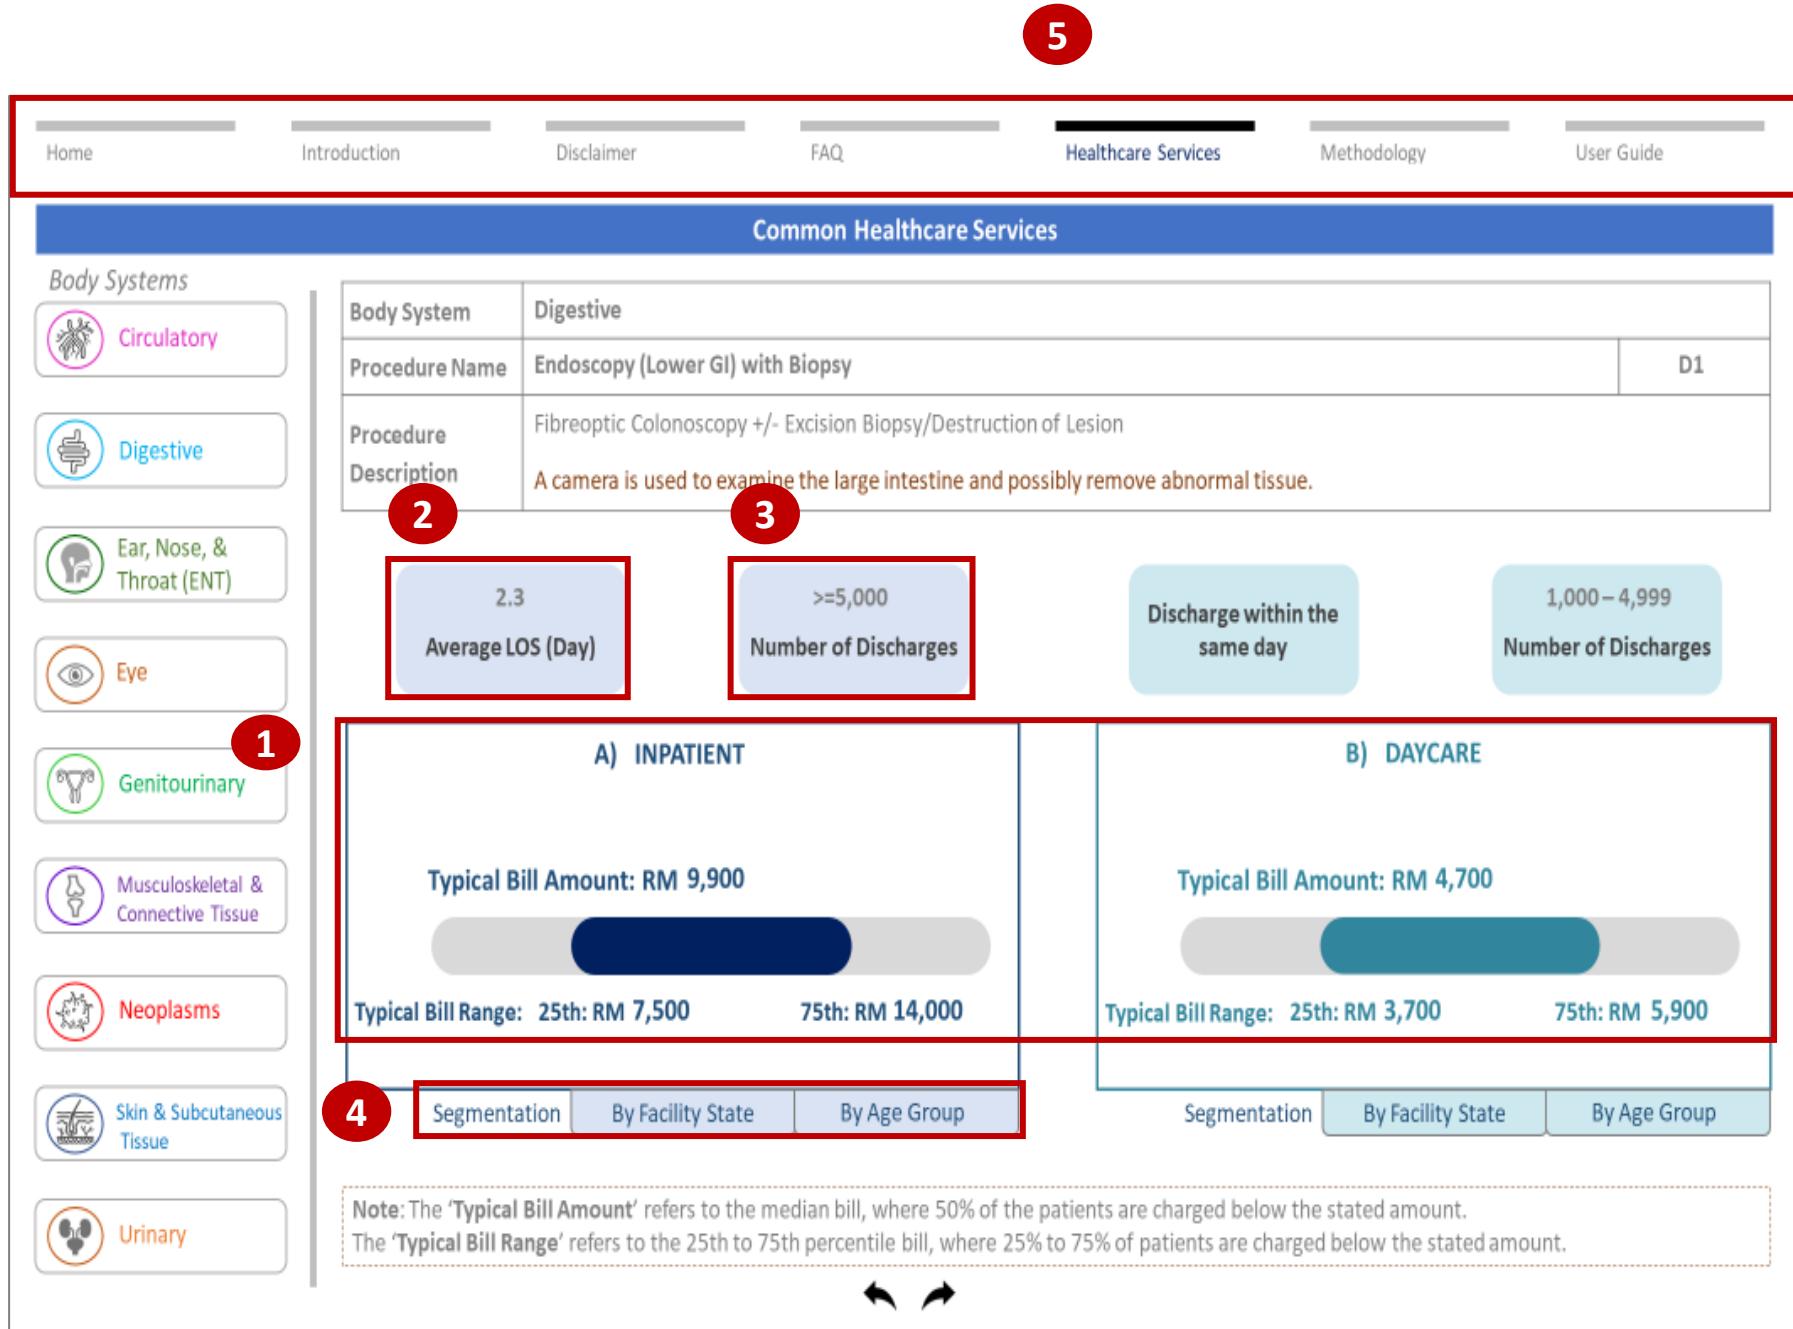

This section details the Common Healthcare Services.

The services are color-coded; the font color used for each service corresponds to the color of its associated body system.

1 Click on each of the Body System to view the corresponding healthcare services.

2 Click on each of the services to view the full details.
(i.e.: Typical Billed Amount, Typical Billed Range, Average Length of Stay, Number of Discharges).

User Guide: Common Healthcare Services

- 1 This section details the '**Typical Billed Amount**' and '**Typical Billed Range**' for Inpatient and Daycare cases. This figure is used to establish benchmarks for in-hospital expenses and captures costs associated with a patient's admission (Inpatient/Daycare) and exclude patients whose conditions are of exceptional complexity or who may be very ill.
- 2 The '**Average Length of Stay (LOS) in Days**' is provided for User reference.
- 3 The '**Number of Discharges**', presented in banding categories, is provided to facilitate more meaningful comparisons and help users assess the reliability of the information.
- 4 Click on either the '**Segmentation by Facility State**' or '**Segmentation by Age Group**' to view the full details.
- 5 Click on the '**Healthcare Services**' tab to return to the healthcare services listing.
